

Energy Engineer

Ecological develops and implements sustainability action plans for real estate portfolios, buildings, and tenants in order to reduce costs, improve efficiency, achieve regulatory compliance, and increase value. Our services range from metering and monitoring, to in-depth audits and analysis, to executing retrofit projects.

We are a dynamic, growing firm looking for an energy engineer to be a part of our growing team. This is a mid-level position that will be responsible for field work and for the implementation of in-house energy efficiency services, including:

- ✓ Energy Efficiency Auditing, Analysis and Reporting
- ✓ Commissioning and Retro Commissioning
- ✓ Energy Modeling
- ✓ Energy efficiency retrofit project management

Requirements:

- Bachelor's degree in Engineering or related field.
- 1 – 5 years' experience completing energy audits equivalent to ASHRAE Level II or higher in commercial and multi-family residential properties. Specific experience in the New York City market preferred.
- Familiarity with energy modeling, commissioning and retro-commissioning.
- Familiarity with commercial and multi-family residential building management and operations.
- Licensed Professional Engineer (PE), Licensed Architect (AIA) Certified Energy Manager (CEM), Certified Energy Auditor (CEA), Certified Building Commissioning Professional (CBMP), or Commissioning Process Management Professional (CPMP) preferred but not required.

Compensation: Compensation package commensurate with experience. Full health and dental plan provided.
